Abhinav Bharadwaj R

DevOps AI Engineer

abhinavbharadwajr@zohomail.in • +919500188610 • Bengaluru, Karnataka, India • LinkedIn • Website

SUMMARY

Technology professional with 6+ years of experience spanning enterprise networking and backend engineering, including 4+ years building scalable microservices and distributed systems in regulated Banking and FinTech environments.

Focused on implementing DevOps and DevSecOps practices across CI/CD-driven deployment pipelines, Infrastructure as Code (IaC), containerized workloads, and AWS-based secure cloud architecture. Strong exposure to cloud security, IAM-based least privilege access design, governance & compliance controls, and secure SDLC practices aligned with production reliability requirements.

Long-term oriented toward DevSecOps leadership, embedding security, automation, and infrastructure resilience into modern financial systems.

EXPERIENCE

DevOps AI Engineer | OnFinance AI *Jan 2026 – Feb 2026*

- Designed and enforced AWS IAM role segregation implementing least privilege access and Role-Based Access Control (RBAC) across Platform, Development, and Cloud Administration teams.
- Implemented organization-wide multi-factor authentication (2FA), strengthening cloud security posture and reducing attack surfaces across operational access planes.
- Strengthened secure cloud architecture by refining IAM policies, enforcing least privilege access, and aligning access controls with governance standards.
- Contributed to migration from LiteLLM to BiFrost LLM Gateway, improving operational reliability, usage governance, and secure service delivery.
- Operated within a high-velocity cloud-native startup environment implementing DevSecOps-oriented secure deployment practices.

DevOps Engineer | Servion Global Solutions *Oct 2021 – Jan 2026*

- Contributed to enterprise-scale modernization initiatives for Dubai Islamic Bank (DIB) under the Core Banking Transformation Program (Oracle Flexcube → Temenos T24 Transact), operating within regulated environments requiring strict governance & compliance controls.
- Designed and optimized REST APIs within distributed systems architecture, improving middleware performance and enhancing production reliability.
- Implemented Kafka-based event-driven messaging systems supporting scalable microservices across mission-critical banking channels.
- Developed Jenkins-based CI/CD deployment pipelines, advancing release automation and reducing deployment lead time by 40%.
- Applied Git-based branching strategies to enable secure SDLC workflows and traceable release governance across multi-team environments.
- Collaborated with infrastructure and operations teams to align deployments with environment readiness, compliance standards, and system stability objectives.

Site Reliability Engineer – Networking | Tejas Networks *Nov 2019 – Oct 2021*

- Led SDH-to-OTN modernization of telecom backbone network for TCL's Southern Ring, improving bandwidth utilization and fault tolerance.
- Provided L2/L3 network stability support for Bharti Airtel SDH infrastructure, ensuring high availability and SLA adherence.
- Automated operational workflows through scripting and process improvements, improving system stability and contributing to high availability production reliability standards.
- Awarded "Best Partner Support Engineer" for operational excellence and reliability performance.

EDUCATION

Anna University *2015 – 2019*

Bachelor of Engineering (B.E.), Computer Science and Engineering

Relevant Focus Areas: Data Structures, Operating Systems, Computer Networks, Distributed Systems, Database Systems

G. K. Shetty Vivekananda Vidyalaya Junior College *2001 – 2015*

High School Degree • Computer Science

SKILLS

Backend & Distributed Systems

Java, Spring Boot, REST APIs, Kafka, Microservices Architecture

Cloud & Platform

AWS (IAM, EC2, S3), Microsoft Azure, Kubernetes, Docker, Linux

CI/CD & Automation

Jenkins, Git, Bitbucket, OpenTofu (Terraform), Shell Scripting

DevSecOps & Governance

IAM Policy Design, Least Privilege Access, Role-Based Access Control (RBAC), Secure SDLC, Infrastructure as Code (IaC), Cloud Security, Governance & Compliance

Observability & Reliability

Log Analysis, Release Traceability, Production Stability Support

LICENSES & CERTIFICATIONS

Amazon Web Services

Cloud Practitioner • AI Practitioner

Google

Cloud Computing Foundations

Microsoft

Azure Fundamentals • Data Fundamentals • Security, Compliance, and Identity Fundamentals • Power Platform Fundamentals • Azure AI Fundamentals

KodeKloud

12 Factor App • DevOps Pre-Requisite Course • Fundamentals of DevOps • Learning Linux Basics • Learning Shell Scripts

HONORS & AWARDS

Customer Delight Award – Servion Global Solutions

Recognized for outstanding performance in Project delivery and support activities for Contact Center at Dubai Islamic Bank during FY'24 – Q1.
